*Updates are provided as significant changes in activity occur.*

## 7/10 Stuart Creek 2 Fire

### **Evacuation Order Lifted for Milepost 18-24 Chena Hot Springs Road:**

The evacuation order was lifted along the Chena Hot Springs Road between mileposts 18 and 34 at 3p.m, July 8, 2013. An evacuation watch is still in effect for mileposts 16-34. The fire is 22% contained and now is 84,275 acres. The Tanana Fairground is still open to hosting animals for residents within the evacuation watch area. The Chena Hot Springs road and Resort are open. For information on the Chena River State Recreation Area, please contact: (907) 451-2695 or visit [www.dnr.alaska.gov/parks/asp/curevnts.htm](http://www.dnr.alaska.gov/parks/asp/curevnts.htm).

The fire is both still south of the Chena River and east of the Grange Hall Road. Crews continue to hold the fire on the Quarry and Brigadier Road on the fire's south flank. There are 23 hand crews, 24 engines, 13 dozers, 7 water tenders, 7 helicopters, and air tankers are available to be working on the fire.

The fire rate of spread has been tempered by scattered rain showers over the last few days. Firefighters will continue to provide structure protection in the threatened communities and efforts are aimed at holding the fire south of the Chena River. Significant progress was made in direct hand and dozer line construction yesterday.

Wetter conditions will continue through Wednesday night. A change in the weather pattern with higher temperatures, very low humidity and stronger wind has been forecasted to begin Thursday and will last well into the weekend that will lead to increased fire conditions. The current moderate weather is affording the opportunity to aggressively attack the fire with direct fire line construction.

The fire location in the Military Impact Area poses a risk to firefighters of exposure to dangerous and unexploded ordnances. Construction of fire line by ground personnel within the impact area is prohibited, greatly limiting containment efforts. Lack of road systems in the vicinity of the fire limits access to many areas. Recent rains have made some roads extremely difficult to drive on or are impassable, further hampering access to some portions of the fire.

**For tips on how to prepare for a potential evacuation and what to do if you are evacuated,** residents are encouraged to visit the “Ready, Set, Go” website at <http://www.inciweb.org/incident/article/3052/15480/>.

Additional Information on emergency preparedness is available from the Fairbanks North Star Borough <http://www.co.fairbanks.ak.us/EmergencyOperations/default.htm>.

## **Smoke:**

All communities near the fire should expect to be impacted by smoke. In the evenings and morning, smoke sinks to the lower elevation communities like North Pole, Fairbanks, and Eielson AFB. For information on smoke conditions, visit this website: <http://co.fairbanks.ak.us/airquality/>. Smoke can pose health concerns for the public. Residents are encouraged to visit the “Protect Yourself from Smoke” website for smoke protection information at <http://www.cdc.gov/Features/Wildfires/>.

It is very important that homeowners take time to create defensible space. The Alaska Firewise brochure provides guidelines for emergency preparedness and measures that can be taken to prepare a home and property for wildland fire <http://forestry.alaska.gov/pdfs/firewise09.pdf>.

## **7/10 Moon Lake (#401)**

The fire is 17,155 acres. Rain has moderated fire spread and activity. Smoldering and smoke is being observed along flanks and in unburned interior pockets of fuel. Crews will continue structure protection in Mansfield Lake Village. There is potential for the fire to moving north. Assessment of opportunities for direct line will continue along with patrol and monitoring by boat and air. For more information please visit <http://inciweb.nwcg.gov/incident/3459/>.

## **7/10 Skinny’s Road Fire (#388) –The Fire Is 100 Percent Contained and the Parks Highway Is Open**

The 1,806-acre fire is now 100 percent contained. The fire is near Mile 238 of the Parks Highway. The Parks Highway is open and it is safe to travel the road without a pilot car. Personnel will continue to secure interior unburned islands, mop-up, and back-haul supplies. They are beginning rehabilitation operations and the team is preparing to turn the fire over to the local unit. Fire updates may be available on <http://inciweb.nwcg.gov/incident/3456/>.

## **7/10 – Fire Information Update**

A total of **89** fires are active statewide, according to the Alaska Interagency Coordination Center. A total of **448** fires have burned **1,036,437** acres so far this year; **7** fires are staffed.

Information on travel conditions and fire-related road closures can be found at <http://511.alaska.gov>.

Keep informed of local fire information sources and air quality reports. The Alaska Department of Environmental Conservation has smoke information at <http://www.dec.state.ak.us/air/am/smoke.htm> and <http://dec.alaska.gov/air/smokemain.htm>. For “Frequently Asked Questions” visit [http://www.dec.state.ak.us/air/smoke\\_qa.htm](http://www.dec.state.ak.us/air/smoke_qa.htm).
